# Africa rising... but risks remain

Per capita GDP growth: outlook vs. past decade

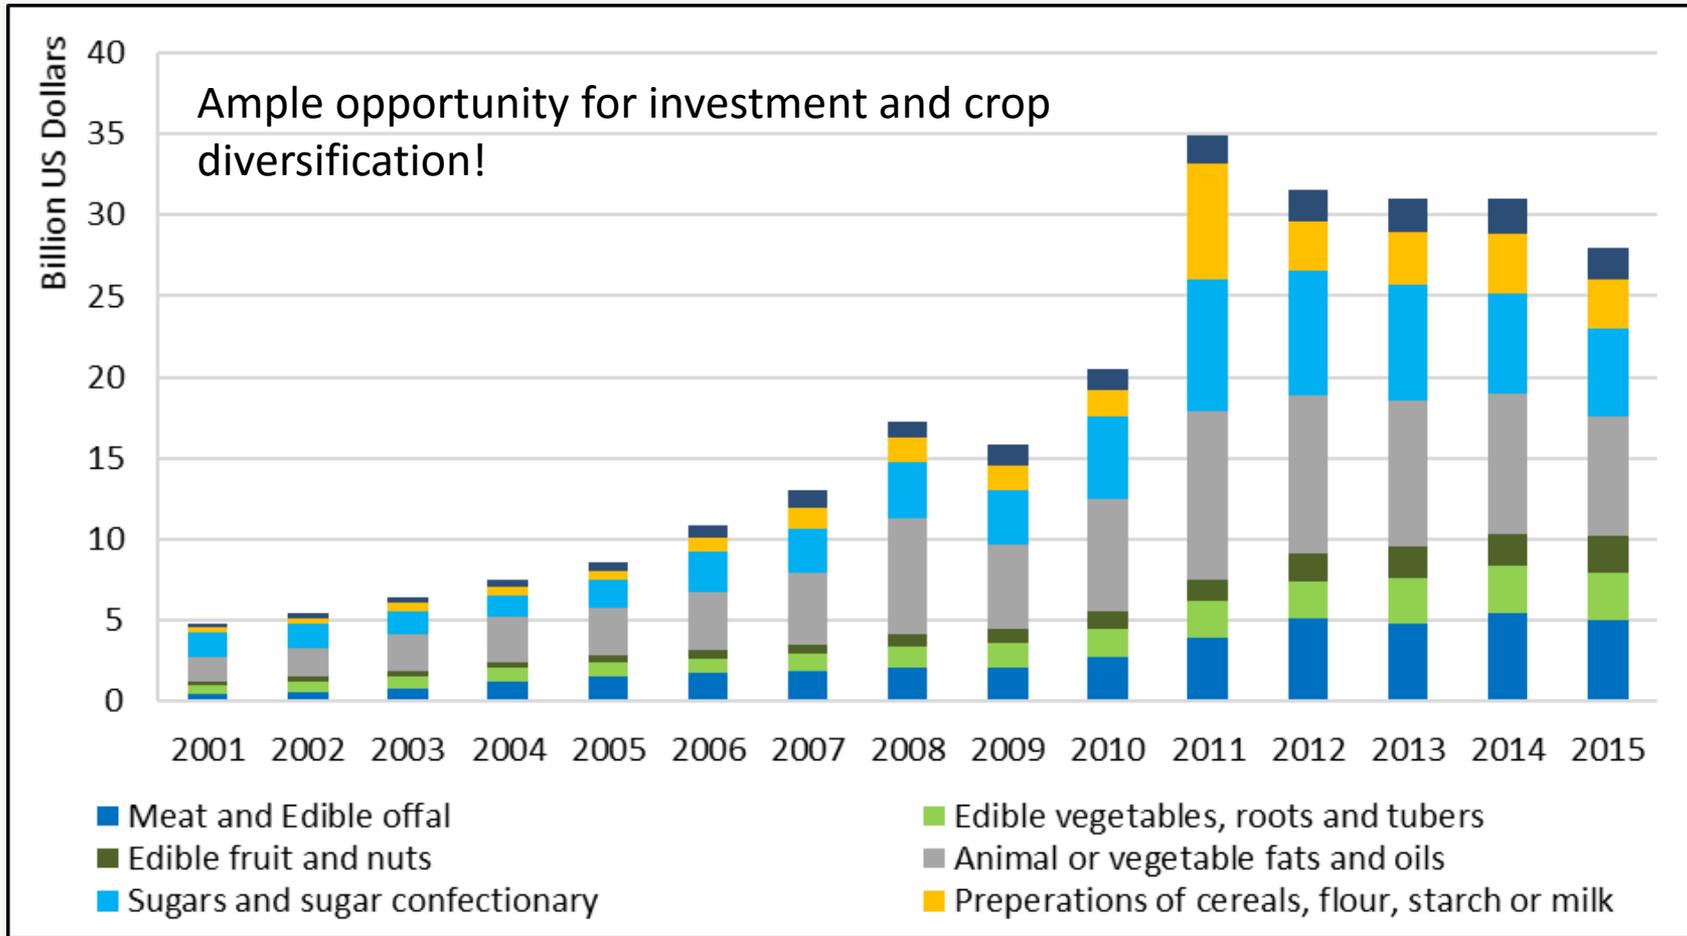

Source: IMF World Economic Outlook, October 2016

## Past decade growth:

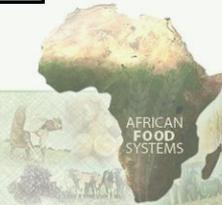

- Improved business and macro-economic environment
- Commodity price boom
- Accommodative financial conditions globally
- Absolute income remains low
- Commodity exporters must adapt
- Agriculture remains important sector – 15%-40% of GDP in many countries

# Megatrends shaping Africa's future

## 7 Megatrends

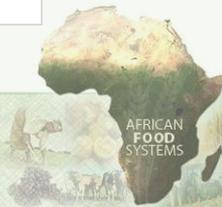

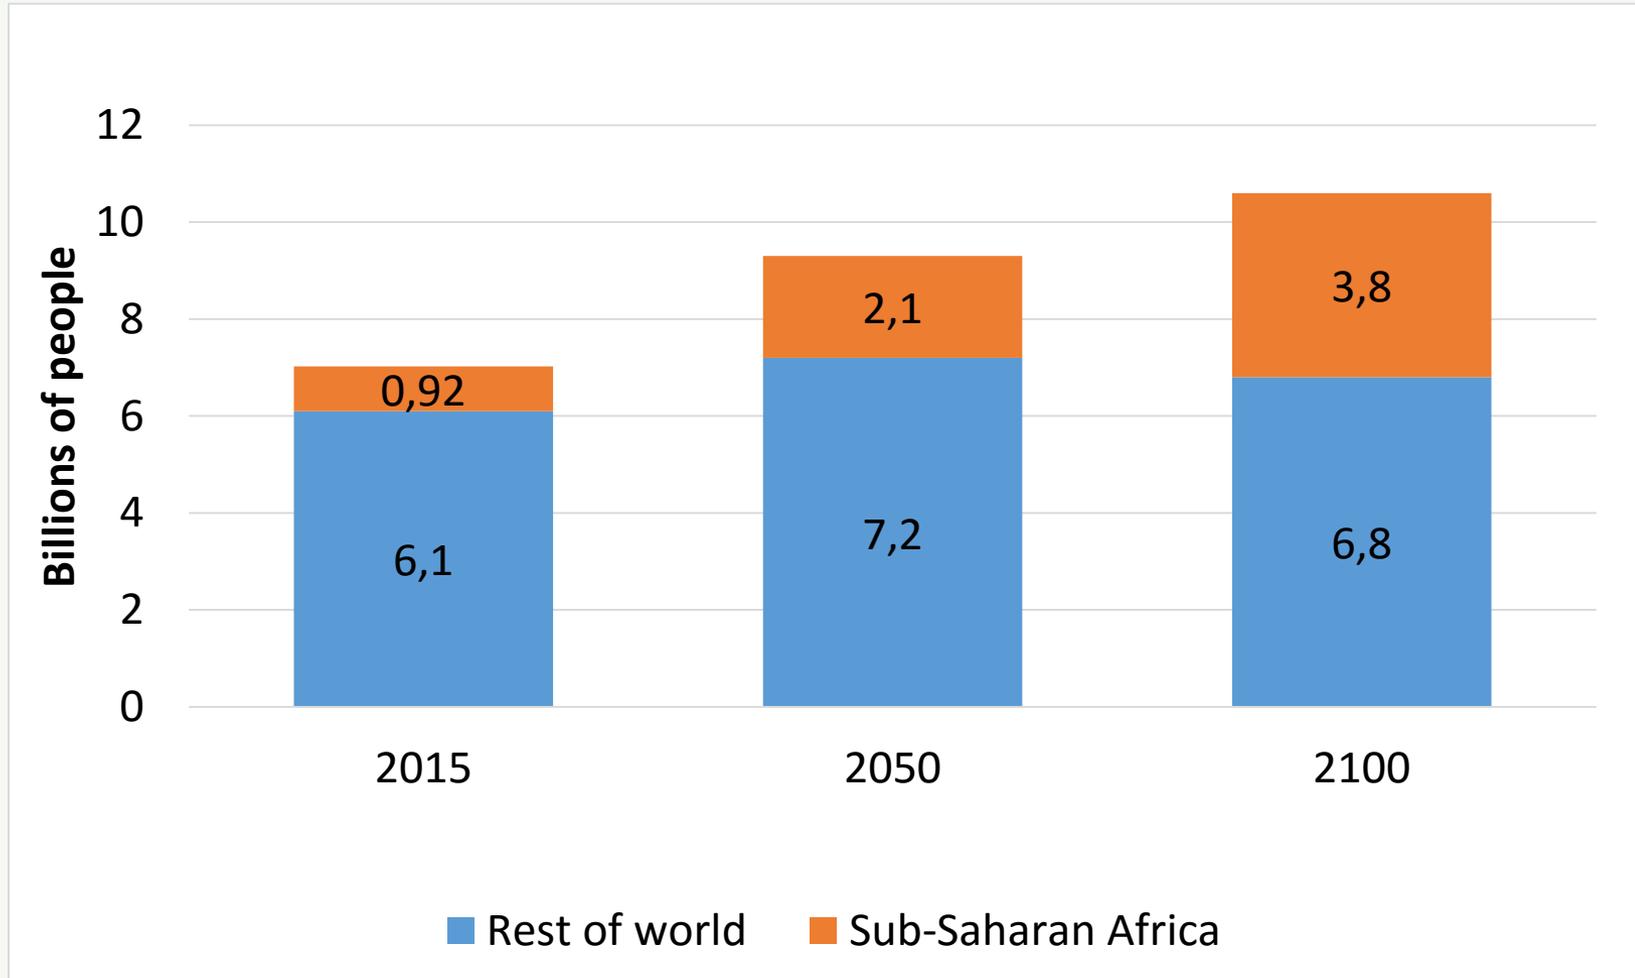

1. Global food and energy prices
2. Africa's Population explosion
3. Shift in labour force to non-farm employment
4. Changing Farm structure
5. Soil degradation
6. Climate variability

# Megatrend 4: Changing farm structure

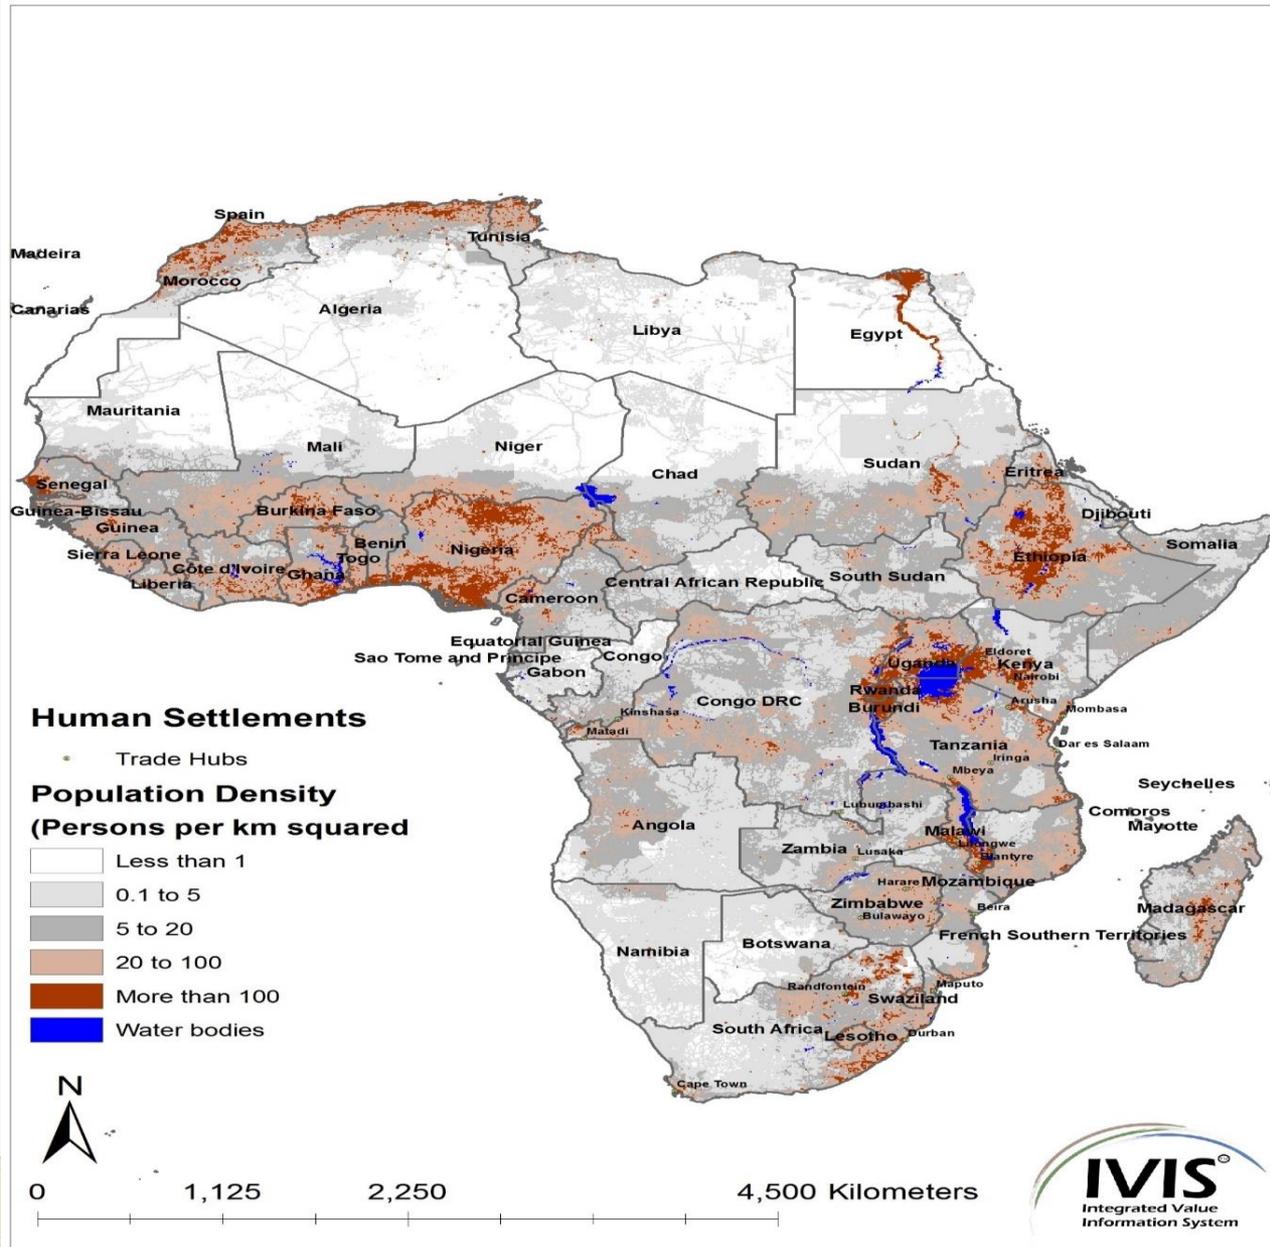

Source: Jayne et. al., 2016

# Megatrend 4: Changing farm structure

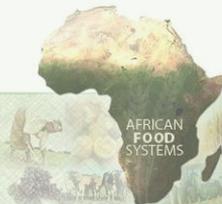

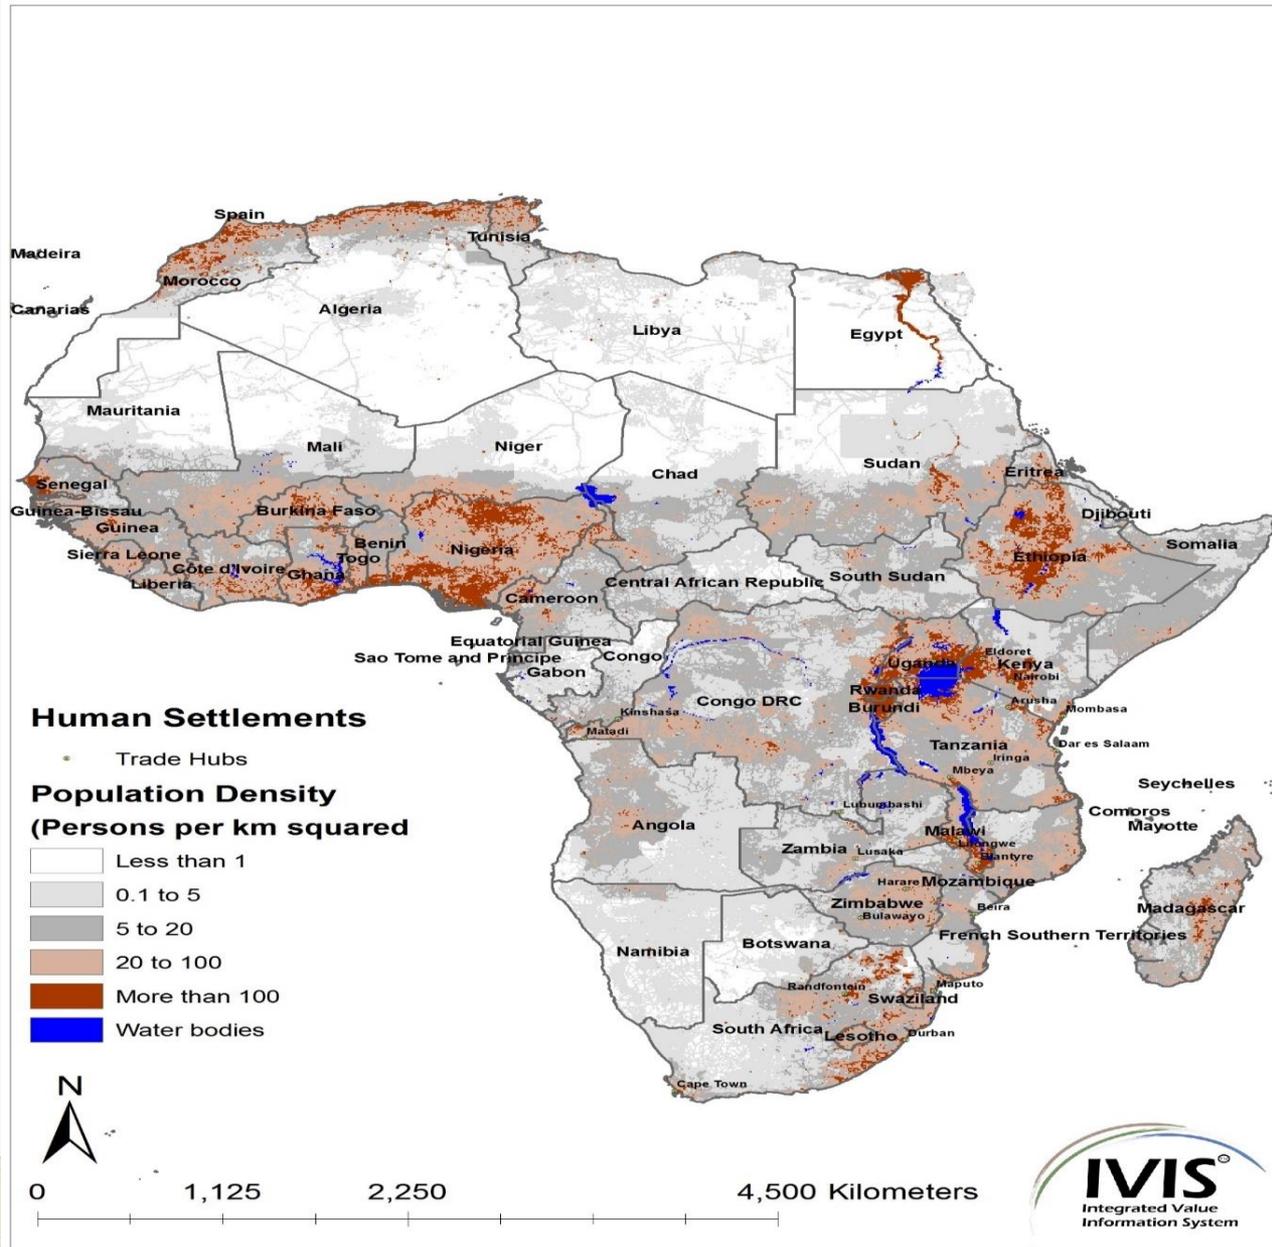

- Concerted effort to transfer land from customary tenure to private individuals
- Tenure changes linked with changes in land markets as land sales and rental markets develop rapidly
- Provides opportunities for investment in African agriculture
